

Sanjeevani v2 - Diagnostic Risk Report

Generated: 2026-05-05 07:35

Patient Information

Name: Sam
Patient ID: sam-987654321
Bed: ICU-S1
Status: admitted

RULE

SOFA Score

Total Score: 6 / 24
Sepsis Criteria Met: True
Respiration: 2/4
Coagulation: 1/4
Liver: 0/4
Cardiovascular: 2/4
Cns: 0/4
Renal: 1/4
Organ Failures: cardiovascular

RULE

qSOFA Score

Score: 2 / 3
High Risk: True

RULE

SIRS Criteria

Criteria Met: 3 / 4

RULE

AKI (KDIGO)

Stage: 1
Trigger: creatinine
Details: Creatinine increased above baseline

RULE

Ventilator Weaning Readiness

Status: Not Ready
Readiness Score: 2 / 5
Blocking: High Vasopressor Support; High FiO2

RULE

AMR Alerts

Organism: MRSA [High]
Resistant To: Methicillin, Oxacillin
Recommended: Vancomycin, Linezolid

Sanjeevani v2 - Diagnostic Risk Report

Generated: 2026-05-05 07:35

Clinical Narrative

Patient Sam is currently admitted to the ICU and presents with signs of sepsis. The SOFA score is elevated primarily due to respiratory and cardiovascular components. MRSA has been detected, requiring Vancomycin or Linezolid. The patient is currently not ready for ventilator weaning due to high vasopressor requirements.
